

# Main Street Project Progress Update

Welcome to the first progress update for the Main Street South Project. This is planned to be a weekly re-cap and look-ahead to keep you up to date on what's happening. Don't worry, the format will improve.

## What's Been Going On?

It was a busy week at the project site. We had a groundbreaking ceremony, PSE completed their gas work, and a whole lot of dirt was moved to make room for sidewalks. Oh—and lots of BIG rocks; who knew. Overall, the project is starting to take shape, at least in a small area.

## What's Coming Up?

The week of 9/26 will see a continuation of current activities like grading and storm line installation. The contractor is also bringing in additional crews to do water main work (hydrant relocation) in spots between Big Rock and NE 145th. Overall, the focus will continue to be between NE 145th and Valley Street. Traffic delays should be expected as their will be alternating single lanes of traffic throughout the work days.

Thank you for your patience!
